

International EMECS Center

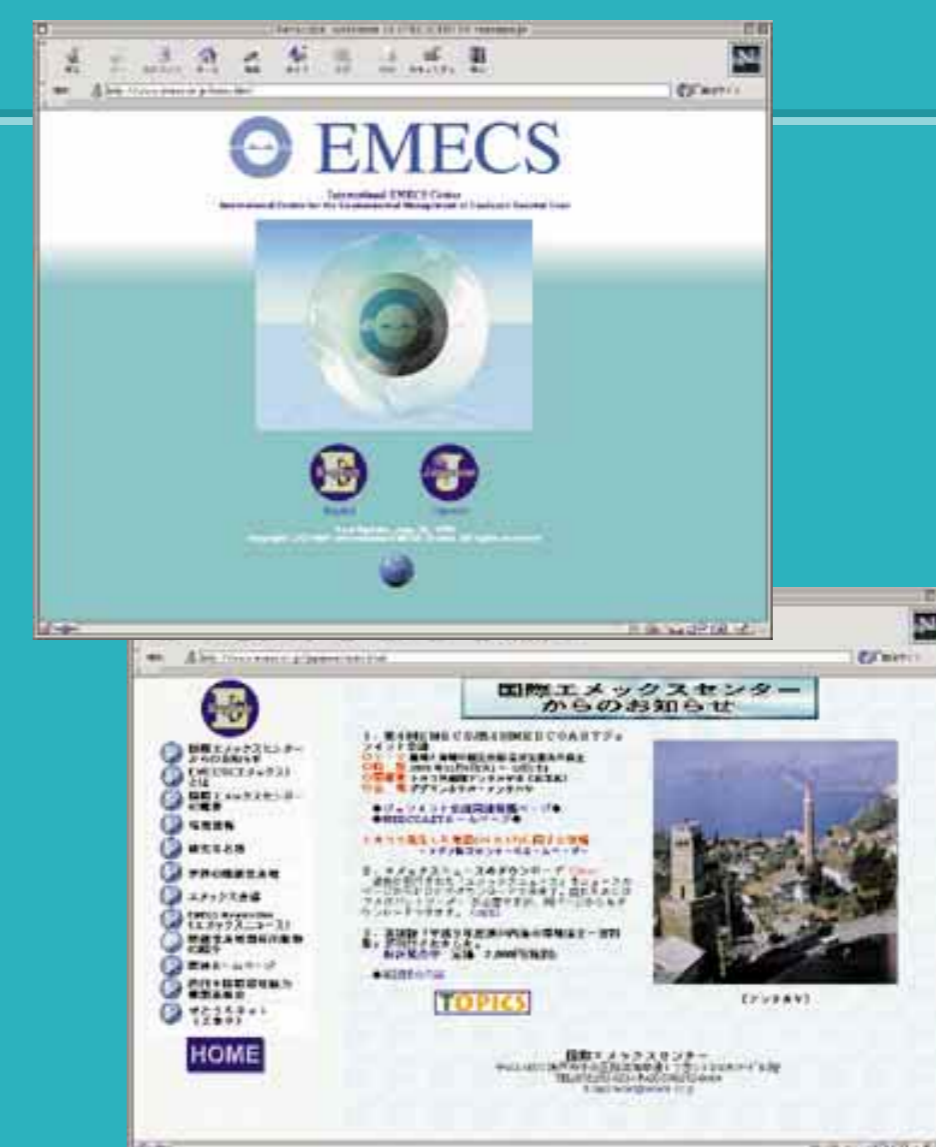

Activities

① EMECS Conference

To promote the holding of future EMECS Conferences in various relevant parts of the world, the Center helps in conference planning, holds negotiations with relevant organizations and gives aid to sponsoring organizations. The Center also holds workshops and forums that spotlight particular problems affecting enclosed coastal seas.

② Information exchange

To promote exchanges of information regarding enclosed coastal seas, the Center issues a Newsletter in both English and Japanese. The Center maintains a Homepage (<http://www.emecs.gr.jp>) to provide and gather the information on enclosed coastal seas worldwide.

③ Training

In cooperation with the Japan International Corporation Agency (JICA), the Center has been responsible for the group-training course on Systems of the Environmental Management of Enclosed Coastal Seas since 1990. The Center also supports other training courses.

④ Support for international activities

The Center supports researchers and relevant organizations to promote researcher's activities on the environmental management and appropriate use of enclosed coastal seas.

⑤ Additional publications

The Center issues relevant materials on the environmental management and appropriate use of enclosed coastal seas in addition to the Newsletter.
