

## **THE NEW MARITIME PORT IN TRIBUGA GULF, IN COLOMBIA: A FRIENDLY RELATIONSHIP BETWEEN NATURE, PEOPLE AND DEVELOPMENT**

### **CONTO GARCIA JOSE HELIODORO.**

Marine Biologist. JICA ex fellow. Environmental Management of Enclosed Coastal Seas and Marine Resources adviser.

The countries in the Pacific basin area, are looking for new opportunities for the empowerment of their economies and development, through the commerce and the communications.

The Pacific coast in Colombia offer the most important alternative for the Pacific basin and her neighbors, with the construction of the new maritime port in the tribuga gulf.

Technically, this area has the most amazing reasons for the new port in consideration to:

Geographical position, very close to the Panama channel

High capacity for receive superthank ships and cruisers

High deep in the access channels and,

Terrestrial roads that communicate with all the south americans countries.

The inhabitants in the Pacific coast in Colombia are working very hard for the success of this project that, without doubt, will be the redention of the people based in that region.

The Pacific coast in Colombia is very rich and diverse in ethnica; the inhabitants are represented by indigenous communities (10%) and black communities (90%). By the other hand, the biodiversity in the Pacific is the number two in the world, after the african continent.

Colombia, almost her amazing biodiversity, is a privilegiate community in the world, because:

The geographical position in the superior corner in the south of the american continent

Has coasts in the two big oceans : Atlantic ocean and Pacific Ocean and,  
Is located in the pacific basin where his neighbors are the most important in development, technologies and industries: the Asian continent

For it, the new port in the colombian coast, offer the opportunity for the social and economical development of the black and indigenous communities in the Pacific, with an armonious relationship between the environment, the people, the technology and the progress.
